Overview of Waste Management's Proposal

Waste Management, Inc. has said that it plans to petition state and local governments for a 1,550 acre landfill site in the Mckowns Mountain community at the Patrick Road and Mckowns Mt. Road intersection. The proposed site is a very short distance away from Duke Power's proposed nuclear energy plant and is in the vicinity of many residents in the area. The facility could take trash from a 75 mile radius around the area and would result in many more large vehicles on the county's roadways.
